DETAILED ACTION

Response to Arguments

Applicant's arguments filed 8/19/05 with respect to unamended Claim 37 and its dependents have been fully considered but they are not persuasive.

Applicant's arguments filed 8/19/05, with respect to the rejections of Claims 1-6, 8, 10, 12, 14-19, 28-36 under 102(e) and 103 have been fully considered and are persuasive based on the added claim limitations. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Thompson et al., US-6,675,049 and Goedeke, US-6,167,312 and in view of Lee et al. US-6,920,360.

Claim Rejections - 35 USC § 102

Claims 37-39, 42, 44-47 stand rejected under 35 U.S.C. 102(e) as being anticipated by Thompson et al., US 6,675,049.

Applicants argue that the transponder in the Thompson device is not wired to the IMD. While this statement is true, Claim 37 (original) merely calls for receiving a data stream from the IMD via a conductor. This is not the same as wired transmission as it is broad enough to encompass an antenna (which is a conductor) the receives a wireless signal from the IMD as in Thompson et al. As such this rejection is made FINAL.

Claims are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al.

Application/Control Number: 10/052,496 Page 3

Art Unit: 3762

Claim Rejections - 35 USC § 103

Claims 1-19 and 28-36 are, and Claims 40, 41 and 43 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Thompson et al. in view of Goedeke et al. As to Claims 1 and 28 applicants have added the term "wired" to define over the Thompson wireless data transmission to the external to the IMD telemetry module, however, it is widely accepted in the art that wired and wireless (as well as other transmission modalities as optical, etc.) are known functional equivalents and therefore the subject of design considerations lacking in patentable moment. For example, Goedeke et al. teach that wired and wireless connections are interchangeable in the implantable device telemetry art, col. 7 at lines 27-67. As such it would have been obvious to those having ordinary skill in the art at the time of the invention to have utilized a wired communication path in the Thompson et al. device instead of the disclosed wireless path as a mere substitution of known functionally equivalent data transmission options.

As to Claims 40, 41 and 43, absent specific arguments to address this rejection, the rejuection is hereby made FINAL.

Allowable Subject Matter

Claims 20-27 are allowed.

Application/Control Number: 10/052,496

Art Unit: 3762

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey R. Jastrzab whose telephone number is (571) 2724947. The examiner can normally be reached on Monday - Wednesday 5:30 a.m. to 4:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela D. Sykes can be reached on (571) 272-4955. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
